Criteria List ✕

Inclusion | **Exclusion**

Member has been previously diagnosed with significant obstructive sleep apnea:

▼ One of the following must pass

- Results of a PSG or HSAT indicate AHI or RDI or REI measured on HSAT greater than or equal to 15 events per hour,
- Review to see sub-requirements
AHI or RDI or REI measured on HSAT greater than or greater than or equal to 5 events per hour but less than 15 with clinical evidence of one of the following conditions:
 - ▼ One of the following must pass
 - Excessive daytime sleepiness
 - Impaired cognition
 - Mood disorders (e.g. depression, anxiety)
- Presence of a comorbid condition or concomitant secondary sleep disorder that may necessitate an attended titration: Comorbid medical conditions such as:
 - ▼ One of the following must pass
 - Moderate to severe COPD as diagnosed on pulmonary function studies (PFTs). Other evidence of moderate to severe COPD may include:

The Problem at Hand

Current methods of prior authorization review are inefficient.

Current case reviews are done entirely manually and require nurses or doctors to search through messy medical records for key information. Each case review can take 20 min - 1 hour, causing a bottleneck in the process.

Our solution

Introducing, Fairway Health, the AI Assistant for UM Teams.

→ Fairway Health helps nurses or doctors determine medical necessity within minutes. We do this by providing AI-generated rough draft evaluations and automated decision rationale.

How does it work?

Fairway Health seamlessly integrates with your workflow to simplify your job.

→ The platform reads in medical records and makes rough draft evaluations customized to your specific policies. We eliminate the manual search process by displaying direct evidence pulled from medical records for easy reference.
